Terms of Reference
(Land Management Consultant)

1. Background
The Government of India has received financing from the World Bank toward the cost of the Ecosystem Services Improvement Project. Indian Council of Forestry Research and Education (ICFRE) is one of the implementing partners of ‘Ecosystem Services Improvement Project (ESIP)’ and may implement one of the components of ESIP, i.e., Scaling up Sustainable Land and Ecosystem Management (SLEM) in Selected Landscapes. The main objectives of this component are to prevent land degradation and desertification and increase above-ground forest carbon stock through a combination of investments to implement and scale-up tried-and-tested SLEM best practices, to increase national capacity for monitoring land degradation and track associated indicators, and to generate knowledge exchange on SLEM approaches. The goal is to benefit small and marginal farmers and other rural poor and to develop a national knowledge platform for supporting a community of practice on SLEM. These activities are designed to overcome the twin challenges of arresting land degradation and meeting food security targets. This component will finance on-the-ground sustainable land management investments in private land holdings and common property lands and enhance knowledge and capacity for further scaling up of SLEM approaches at the national level. It will draw heavily from the best practices and approaches that were tried and successfully developed under SLEM project. This component can help increase national capacity for monitoring the status of land degradation and desertification and SLEM outcomes, as well as the results of UNCCD action programmes at the country level.

2. Objective(s) of Assignment
To facilitate the upscaling of SLEM activities in project areas while contributing to SLEM policy and dissemination of lessons learned

3. Scope of Services, Tasks (Components) and Expected Deliverables
   (a) Scope of Services, Tasks (Components)

   i. Facilitate the upscaling of SLEM best practices related to management of land resources in the project sites;
   ii. Ensure that the programme outputs contribute to strengthening the policy foundations for adopting SLEM approaches
   iii. Provide policy, strategic and operational guidance on the direction of sustainable land and ecosystem management by deriving lessons from SLEM projects and with policy-makers in India
   iv. Gather and disseminate information and experiences on land management to a wide audience beyond the ESIP
v. Gather and disseminate information and experiences on communication strategies for sensitizing on land management

vi. Develop suitable outreach material on the subject of land management for decision-makers and practitioners

vii. Support in documentation of land management, soil and water conservation including identification and documentation of species vulnerable due to land degradation

viii. Identify and develop innovative methods, teaching/learning tools, techniques, approaches and materials, including written, audio/visual material, e-learning tools, field visits, semi-annual best practice notes and models for upscaling SLEM approaches

ix. Help organize trainings, workshops, conferences and other media to disseminate best practices, lessons learnt, and up-scaling and mainstreaming strategies

x. Provide technical support for land management related issues of project

xi. Provide technical leadership and facilitate relevant strategy development for land management

xii. Support development of annual action plans in consultation with the Project Director, Project Manager and other technical consultants, focusing on monitoring and evaluation of project progress/activities

xiii. Support in preparation of relevant guidelines, operational manuals, documents for land management including soil and water conservation

xiv. Support in organizing and facilitating meetings with State Governments, technical expert committees, civil society organizations and other stakeholders related to project implementation

xv. Support in quality implementation of other thematic activities in the project, such as training programmes, communication strategy, project MIS and operations research etc.

xvi. Support the Project Director and Project Manager in implementation of project, preparation of progress reports and other related documents of project

xvii. Building national capacity for land management and implementation of a National Knowledge Network

xviii. Responsible for all activities pertaining to land management including soil and water conservation of the project and

xix. In addition to the above listed tasks, the consultant may be called upon to assist in any other tasks (related to project) assigned by Project Director and Project Manager of ESIP related to the core expertise of the consultant

(b) Expected Deliverables

i. Implement upscaling of SLEM best practices related to management of land resources in the project sites.

ii. Develop and maintain online information database related to ESIP/SLEM in India.

iii. Prepare framework documents of the project related to sustainable land management including soil and water conservation.
iv. Prepare the annual work plan for the project in consultation with other project experts.

v. Prepare regular progress report of the project.

vi. Prepare technical reports, technical papers, policy papers and approach papers related to the project.

vii. Undertake thematic visits related to the project works.

viii. Conceptualize the training modules for building national capacity for sustainable land management, land degradation and desertification monitoring etc.

ix. Any other tasks (related to project) assigned by Project Director and Project Manager of ESIP.

Data and documents/ reports/papers etc. generated by the consultant under ESIP will be the sole property of ICFRE. Consultant should ensure to hand over print and electronic copies of data and documents/reports/papers to the Project Manager of ESIP before completion or termination of the contract.

Performance of the consultant will be measured against assigned work plan and it will be updated every six months. Consultant will submit half yearly progress reports stating her/his accomplishments against the agreed work plan and also submit any other reports as required by the project management authorities. Bi-annual progress reports submitted by the consultant will be reviewed by the Project Director, ESIP.

4. Qualification Requirements

i. Essential qualification is Postgraduate degree in Natural Resource Management/Land Management/Soil and Water Conservation/Ecology and Environment/Forestry or equivalent and desirable qualification is doctorate degree in the relevant field.

ii. Minimum 12 years of experience in land management of diverse landscapes. Candidates with diverse practical and research experience in the field will have an advantage.

iii. Experience of working with government agencies and of working in land management, natural resource management, soil and water conservation will be preferred.

iv. Extensive knowledge of conventions on climate change, combating desertification and biodiversity.

v. Proven record of scientific peer-reviewed publications and development of knowledge products with respect to sustainable land management.

vi. Strong background in land management and application of GIS in land management is an advantage.

vii. Knowledge of and experienced in project cycle management and well versed in logical frameworks.

viii. Fluent in speaking and writing English.

ix. Computer skills and the applications of relevant M&E software.

x. Ability to work effectively in a team interacts persuasively with a range of stakeholders, and travel extensively.
5. Client’s Input and Counterpart Personnel
